

Cropping Explanation:

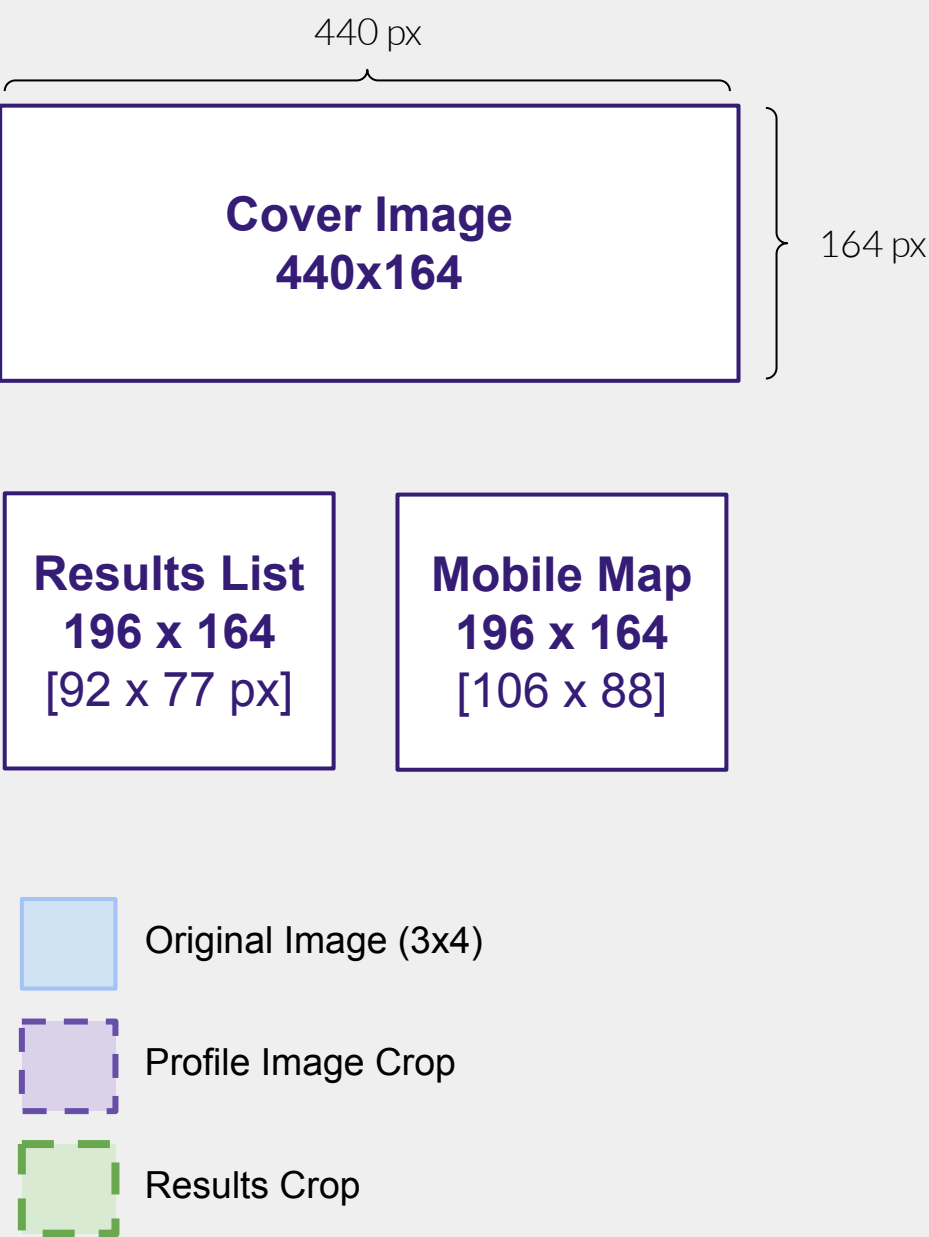

Avela makes photos easy with a single photo for each school that is automatically cropped for use in multiple locations:

- 1. Profile Cover Image - 440x164
- 2. Result List Image - 92 x 77
- 3. Mobile Map View Image - x

We automatically *crop from the center of the image*, so we recommend following the guidelines below to ensure the best possible image!

We recommend using a single, wide profile image of 440x196 px that can be cropped in the middle for the results list.

We automatically resize the image, so all that matters is the aspect ratio. Please give us the highest resolution image you can.

Example Croppings:
